

## SIX REASONS TO INSTALL PRIVIGLAZE SMART GLASS

- 1 Priviglaze Smart Glass is manufactured with the lamination of switchable smart film between two toughened panes of Super Tuff glass.
- 2 Powered by electrical current and operated via remote control, light switch or smart automation; it uses very little electricity.
- 3 The ability for Priviglaze to instantly switch between frosted and clear at the touch of a button offers privacy on-demand.
- 4 Unlike conventional solutions, Priviglaze Smart Glass reduces the use of artificial lighting, allows for more daylight to filter through while blocking 99% of UV rays.
- 5 Priviglaze Smart Glass has countless application with bespoke designs available from single to double glazed, framed and frameless, to timber frames and bifold doors!
- 6 In its Off mode, Priviglaze Smart Glass works as a rear projection screen, ideal for pitch presentations, entertainment videos and digital advertising.
